Executive Technology Advisory Services

Red River Solutions Executive Technology Advisory Services offers a unique team of dedicated Customer Advocates with decades of proven business, technology and industry knowledge. Each dedicated Advocate provides advisory services custom-tailored to the needs of the individual client. They will develop a customized plan that will strategically analyze, manage and align your projects, systems and financial objectives with the goals of your organization.

The Red River Solutions Customer Advocate will bring a deeper understanding and insight into both long-term and immediate issues, improving best practices, offering business and technology solutions, resources and supporting management in their project needs.

Talent Resources/Technology Consulting

Red River Solutions' ability to provide the most cost effective talent for each requirement is the result of a proprietary talent pool management platform supported only by senior recruiting and sourcing professionals. Unique and difficult placement requirements or the creation of entire teams of project specific talent are equally supported with our highly effective systems and international network.

For Fortune 50 and SMB enterprises alike, our seasoned team of specialists makes it easy for clients to dynamically apply or remove talent across a wide range of technology and operational practice areas.

Red River Solutions has distanced itself from the parity in the consultant placement, contract support, and permanent placement markets because of a reputation for quality work and measurable ROI. This occurs by focusing on acquiring or managing only the most talented people at the best cost.

We provide entire teams of professionals for project based services as well as consultants on a staff augmentation basis for:

Implementations

Upgrades

Architecting

Application Maintenance/Post Production Support

Process Analysis

Security Analysis

Project Management/OCM

Training

Infrastructure Projects
